

**CENTRAL WIRE  
& IRON**

# Helping Secure The Future Together.

## VALUE ADDED

Our expert knowledge on security partition design can boost your ROI through cost saving measures

Technical service members with real install experience can help you through your next project from design to install

Integration experts will ensure our security products are compatible and functional with required building specs while maintaining the aesthetic look of each project

## WHY CHOOSE US?

Our agile manufacturing facility allows us to quickly respond to individual project needs. Whether it's a simple cage partition or complex security integration, Central Wire and Iron is positioned to quickly respond to the customer from start to finish while staying true to "Made In America".

## CONTACT US

### DATA CENTERS

Securing some of the most advanced data centers in the world, Central Wire and Iron's engineering integration team will help develop products to meet your data center specs and requirements. Turnkey panels provide the highest level of security with installers and end users in mind.

### MILITARY

The security of some of our nation's greatest military assets rely on Central Wire and Iron's products. Built right here in the USA, we work with military and government agencies to build tough, dependable products that conform to tight Military specs.

### INDUSTRIAL

Manufacturing facilities, logistics hubs and industrial centers all share the need for securing high value assets. Central Wire and Iron's engineers can work with your team to ensure the project design intent and security goals are met.
